

ECKERD COLLEGE

GALBRAITH-WARDMAN FELLOWSHIP FOR 2020

In 1994 John and Rosemary Galbraith started an endowment for a fellowship that supports one Eckerd student, either a rising junior (current sophomore) or rising senior (current Junior), to participate in a research project at the Bermuda Institute of Ocean Sciences (BIOS) over the summer. In 2014, the Wardman family provided the additional support needed to continue this unique opportunity in the face of rising costs.

The internship pays travel to Bermuda, all expenses associated with a 10-week research experience with a member of the faculty of the Bermuda Institute of Ocean Sciences (BIOS), plus a stipend of \$2000.00.

Applicants should email to Professor Siuda (siudaan@eckerd.edu) a brief statement of research interests, unofficial transcripts, one letter of recommendation from a faculty member (other than Brooks, Krediet, Siuda or Szelistowski) and an up-to-date C.V. on or before March 31, 2020. Applications from well-qualified Eckerd students will be sent on to BIOS. The final selection is made by BIOS faculty and will depend in part on matching interests of the intern with the interests of faculty at BIOS. Available project titles and descriptions will be available on the internship webpage at: <http://www.bios.edu/education/eckerd-college-galbraith-wardman-fellowship/>. Students in all disciplines are encouraged to apply. This fellowship is open only to Eckerd students but its existence does not exclude Eckerd students from consideration for other BIOS internship programs.

For more information about applying, contact Professor Siuda at siudaan@eckerd.edu

For more information about BIOS, contact Dr. Andrew Peters at Andrew.Peters@bios.edu
